Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The indicated allowability of claim 4 is withdrawn in view of the newly discovered reference(s) to Kohler (US 3,995,347). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kohler (US patent 3,995,347).

The patent to Kohler discloses the invention, a windscreen wiper, as is claimed. Note figures 2 and 3 which show a unitary, elongate, curved beam (2) and a rubber blade (22) mounted to the beam. The beam has a varying thickness and a "protective end formation" (7) at each end thereof. The formation projects beyond and is spaced from an end portion of the rubber blade (fig.3).

With respect to claims 3 and 4, note that the end formation does appear as "folded" over such that it is folded back on itself. Note that the particular method of forming the end formation is not of significance in product claims as long as the resultant product is the same.

Art Unit: 1744

With respect to claim 7, it appears the beam has a greater curvature in the center thereof.

With respect to claim 8, note that any surface the blade contacts can be considered as a bottom side of the beam.

Response to Arguments

Applicant's arguments with respect to claims 1-4 and 6-8 have been considered but are moot in view of the new ground(s) of rejection. As set forth above, the end formation of Kohler '347 does project beyond the end portion of the rubber blade and is spaced therefrom (fig.3).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary K Graham whose telephone number is 571-272-1274. The examiner can normally be reached on Tuesday to Friday (6:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Warden can be reached on 571-272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
